Wastewater Technicians

Inspection Training Course

November 17th-18th, 2023

Arlington, Texas - RETS

Clint Fischer

Successfully completed 16-hour course and passed a written examination demonstrating professional competence in conducting NAWT standard operation inspections of onsite wastewater treatment systems. Passing this course provides training necessary for completion of the written and field examinations for NSF Accreditation on the following inspection topics:

- Why an operation inspection is required
- Preliminary gathering information on the site, including household characteristics
- Inspecting tanks and pumps
- Inspecting media filters, ATUs, and constructed wetlands
- Soil treatment unit inspection
- Completing the final report and what it means

Credit Hours Earned: 16
